### **Vaccine Supply and Distribution**

To date, 1,035,930 doses of vaccine have been delivered to Manitoba. This includes:

- 735,730 doses of Pfizer vaccine;
- 215,000 doses of the Moderna vaccine; and
- 84,260 doses of the AstraZeneca/Covishield vaccine.

Manitoba expects to receive an additional 5,850 doses of Pfizer this week. Manitoba is also expecting 14,600 doses of Moderna, which will be used at pop-up clinics in rural Manitoba starting the week of June 13.

### **Workforce**

As of June 1, 3,135 people have been hired to assist with Manitoba's vaccination efforts including immunizers, clinic managers, clinical leads, system navigators and observers. This is in addition to 1,270 staff who have been assigned to COVID-19 immunization efforts from regional health authorities, bringing the total of new hires and existing staff to 4,405.

### **Additional Information**

When attending a vaccine appointment, people are reminded to bring their completed consent form (available online at <https://protectmb.ca>), wear a short-sleeved shirt, wear a mask, and bring their health card or other form of

identification. To help support good physical distancing on site, people should arrive no more than 15 minutes before their scheduled appointment time.

Young people aged 12 to 15 can attend their appointment with a parent, guardian or caregiver, or bring a signed consent form at the time of their appointment. If the youth attends without a guardian and without a signed consent form, they will go through an informed consent process to assess their ability to consent on their own and proceed with the vaccine. Young people aged 16 and 17 can sign their own consent form.
