TRAFFIC AND PARKING CONTROLS

Traffic routes and parking areas on school property shall be designated by the School Principal in consultation with the Supervisor of Operations and appropriate advisory groups.

Vehicular traffic on school property is restricted to areas constructed for this purpose, unless authorization otherwise is received from the School Principal.

Vehicular traffic includes all motor driven vehicles, including snowmobiles and motorcycles.

The maximum speed limit on school property shall be 8 kilometers per hour.

To promote smooth flow of traffic and ensure student safety, these traffic routes and parking areas should be clearly marked if their boundaries are not already obvious.
