SCHOOL – COMMUNITY RELATIONS OBJECTIVES

The Board believes that effective schools need the goodwill, respect, and confidence of the public if the School Division is to succeed in its educational mission. To that end, the Board establishes these objectives:

- a) to identify the public's aspirations for their children by maintaining a close relationship with constituents;
- b) to promote public understanding of all aspects of school operation, both at the divisional and local levels;
- c) to involve citizens in the work of the schools, and to encourage public participation in school activities.
